Dear Madam;

I am writing in support of the petition filed by CSPI
to ban medically useful antibiotics in animal feed.

I am now recovering from an upper respiratory infection
that has taken two different antibiotics to kill the bacteria.
This was not a good experience, and could be fatal to some
older people.

Bacteria is becoming more resistant to antibiotics
partly, it is thought, because of the over use of antibiotics
such as in animal feed.

Yours truly,
Joan B. Cooper
